INDIA DEEP TECH CONCLAVE 2026

VIKSIT BHARAT
VISION FOR FRONTIER TECH

DATE

13-14 NOVEMBER 2026

VENUE

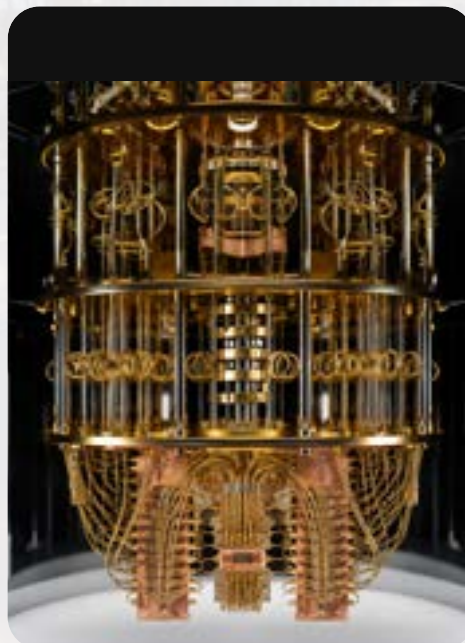

ISB, HYDERABAD, INDIA

ABOUT INDIA DEEP TECH CONCLAVE

The **India Deep Tech Conclave 2026** is conceived to be a platform that brings together policymakers, industry leaders, researchers, investors, defence strategists and civil society to chart India's leadership in frontier and deep technologies - AI, semiconductors, quantum, space, robotics and biotechnology in support of the **Viksit Bharat @2047** vision.

By explicitly pairing capital formation with market creation, and supply-chain diagnostics with global partnership-building, the Conclave positions itself not as a conventional tech showcase but as a working platform to translate India's scientific and startup strengths into a financially sustainable, supply-chain-secure, and globally interoperable deep tech ecosystem.

The Conclave combines keynotes, fireside conversations, technical deep-dives, closed-door roundtables and a curated showcase of some success stories spanning both foundational infrastructure and applications and governance.
